CCS223090

Buy this product at <https://www.nutri4all.com/ccs223090-anti-pathogenen-essentials-90-caps>

Supports, e.g.: healthy digestion and the upper respiratory tract.

Description

Pathogens are microorganisms that can usually cause damage or disease when infecting a host. Antipathogen Essentials is a powerful formula of four herbs, combined with vitamin E. It contains the herbs tea tree oil, black cumin, caprylic acid and olive leaf extract. The combination of these specific herbs with caprylic acid has a traditional use known in natural medicine.

Melaleuca alternifolia (Tea tree) is a tree native to Australia. The leaves have been used for generations by the indigenous peoples of Australia. An essential oil is obtained from the leaves of this tree by means of steam distillation. Tea tree contributes to the protection of cells and tissues against free radicals. Antioxidants can protect against free radicals and help in case of a food intake deficiency or an increased amount of nutrients. Antioxidants protect against free radicals caused by stress, alcohol, UV exposure or polluted environmental conditions. Tea tree contributes to physiological resilience in the face of harsh environmental factors and contributes to physical well-being.

Black cumin (Nigella sativa) has been used since ancient times and has a traditional use. It has a beneficial effect on blood glucose regulation with a daily intake of 25 grams per day in normal individuals and non-insulin dependent diabetics. It has a traditional use known to natural medicine professionals.

Vitamin E contributes to the protection of cells against oxidative damage.

Caprylic acid (octanoic acid) is a saturated fatty acid with 8 carbon atoms that belongs to the group of medium-chain fatty acids. Together with capric acid and lauric acid, caprylic acid is one of the 3 primary fatty acids that occur in coconut oil, among other things. Caprylic acid has a traditional use known to natural medicine professionals.

Olive (Olea europaea) is an antioxidant (polyphenols in Olea europaea extract). It supports healthy digestion, contributes to physiological resilience in the face of harsh environmental factors, aids the upper respiratory tract and contributes to the maintenance of normal blood sugar levels.

In the composition of Antipathogen Essentials, we specifically opted for the synergistic effect of the ingredients. The ingredients have been traditionally used for centuries. The combination of these ingredients in capsules makes them easy to ingest. The supplement can be used for a longer period of time. It is not suitable for children and adults who cannot swallow the capsule.

Suggested usage

- Take 2 to 4 capsules daily divided over the day with a meal, with water or juice, unless recommended otherwise by a healthcare practitioner.
- Do not exceed the recommended dose. Not suitable for children who cannot swallow the capsule.
- Do not take the content out of the capsule. Consult an expert if you are pregnant, plan to become pregnant or while breastfeeding.
- Combination of this product with Cell Essentials enhances its effect.

- Store dry and at room temperature. Keep out of reach of young children.
- A varied and balanced diet and a healthy lifestyle are important.
- Food supplements are not a substitute for a varied diet. Suitable for vegetarians and vegans.
