

L-TRYPTOPHAN 500 MG - 60 CAPSULES

NELTR

Buy this product at <https://www.nutri4all.com/l-tryptofaan-500-mg-60-capsules>

The essential amino acid L-tryptophan can be converted into serotonin and melatonin in our brains

Description

For the conversion of L-tryptophan into serotonin and melatonin, vitamin B6 (pyridoxine) and B3 (niacin) are required as co-factors. To rule out deficiencies of these nutrients, L-tryptophan is ideally combined with vitamin B complex®.

INSTRUCTIONS

2 capsules a day with a glass of water, preferably at 4pm and at bedtime. The recommended daily intake should not be exceeded. Store out of reach of young children.

A food supplement should not be a substitute for a varied and balanced diet and a healthy lifestyle.

Composition

Composition					
Scientific name	English name	Used part	Galenic form	Amount	Function
